### **Skyware Global... Venezuelan VSAT Victory**

***Skyware Global* has been awarded a contract by *Advantech Wireless Broadband* to design and supply antennas for its recent multimillion dollar contract win to provide a new VSAT satellite communications network to the Venezuelan national telecommunications service provider, *CANTV*.**

As part of the deal, **Skyware Global** will design and supply antennas for the use as part of this state-of-the-art telecommunication project, which includes 3,200 remote VSAT (Very Small Aperture Terminals) stations, designed to transmit Internet, voice, video, data, videoconferencing and television services. The project also includes a fully integrated redundant satellite gateway communications system to be provided and installed for the existing satellite network at the customer's teleport.
